

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently amended) A system ~~for configured to~~ claiming a user-specific website ~~where a website request is made for the user-specific website and at least one phone number is associated with the user-specific website, the system~~ comprising:

a phone call receiving device configured to receive telephonic communications; and

a phone number detection device communicatively coupled to said phone call receiving device and configured to identify a source phone number when a phone call is received at the phone number detection device, and a system website coupled to the Internet;

wherein:

the website request is performed at the system website in response to a request by the user, establishing a website claim to the user-specific website; and

the system is configured to, in response to a request for a user-specific website, the request including at least one phone number associated with the request, effect a claim to the user-specific website based on verification of the at least one phone number by the phone number detection device the website claim is confirmed by receiving at the phone call receiving device a phone call from the user, where the at least one phone number associated with said user-specific website is verified by the phone number detection device.

2. (Currently amended) The system of claim 1, wherein said effect a claim comprises receiving telephone communications from the phone number associated with the request indicating confirmation of the request website claim is completed by acceptance of the user-specific website by phone.

3. (Currently amended) The system of claim 1, wherein the system is further configured to accept the website request is performed by completing based on completion of an electronic form at the system a website.

4. (Currently amended) The system of claim 1, wherein the ~~website~~ claim is valid for a pre-defined length of time.

5. (Currently amended) The system of claim 1, wherein the verification comprises receiving indication of the at least one phone number by the phone call receiving device by asking a user for the at least one phone number, disconnecting; and calling the user back at the at least one phone number.

6. (Currently amended) The system of claim 1, wherein ~~the confirmation of said effect the website claim also requires the~~ is based on entrance receipt of a personal identification number (PIN).

7. (Currently amended) The system of claim 6, wherein the ~~personal identification number PIN~~ is provided to a user at the system website ~~upon establishing the website claim.~~

8. (Currently amended) A method ~~[[for]]~~ of claiming a ~~user-specific website associated to one or more phone numbers, comprising the steps of:~~

~~performing~~ receiving a request for a user-specific website request at via a system website in response to a request by the user to establish a website, ~~claim to the user-specific website, the request including at least one phone number associated with the user-specific website;~~

~~confirming the website claim by receiving at a phone call receiving device a phone call from the user;~~

~~detecting, by a phone number detection device, a source phone number from the of a phone call from the user received at a phone call receiving device; and~~

~~confirming the website claim by verifying that [[a]] the at least one phone number associated [[to]] with the user-specific website corresponds to the phone number detected by [[a]] the phone number detection device coupled to said phone call receiving device.~~

9. (Currently amended) The method of claim 8, further comprising:

~~completing by phone~~ effecting the website claim upon said confirming by acceptance of the user-specific website.

10. (Currently amended) The method of claim 8, wherein the website request is ~~performed by completing~~ generated by completion of an electronic form at the system website.

11. (Original) The method of claim 8, wherein the website claim is valid for a pre-defined length of time.

12. (Currently amended) The method of claim 8, wherein the at least one phone number ~~may also be~~ is verified by ~~asking a user for the at least one phone number,~~ disconnecting the phone call[[.]] and calling the user back establishing another phone call using at the at least one phone number.

13. (Currently amended) The method of claim 8, wherein ~~the confirmation of the website claim also requires the entrance of a personal identification number~~ the confirming is performed based on entry of a personal identification number (PIN).

14. (Currently amended) The method of claim 13, wherein ~~the personal identification number PIN~~ is provided to a user at the system website upon establishing the website claim.

15. (Currently amended) A system ~~for configured to~~ claiming a user-specific website ~~where a website request is made for the user-specific website and at least one phone number is associated with the user-specific website,~~ the system comprising:

a phone call receiving device configured to receive telephonic communications over a first connection, the telephonic communications including a request for a user-specific website and a phone number associated with the user-specific website; [[and]]

a phone number detection device communicatively coupled to said phone call receiving

device and a ~~system website coupled to the Internet~~[[.]] configured to determine a source phone number when a phone call is received at the phone number detection device and verify that the source phone number matches the phone number associated with the user-specific website;

wherein:

~~the website request is performed by receiving a phone call into the phone call receiving device from the user, where said at least one phone number associated with the user-specific website is verified by the phone number detection device, establishing a website claim to the user-specific website;~~

a website claim to the user-specific website is established based on verification of the phone number associated with the user-specific website by the phone number detection device
and

~~the website claim is completed by accessing the system website and accepting the user-specific website~~ confirmation of the request at a system website.

16. (Currently amended) The system of claim 15, wherein the website claim is valid for a pre-defined length of time.

17. (Currently amended) The system of claim 15, wherein the verification comprises the at least one phone number may also be verified by asking a user for the at least one phone number, disconnecting the first connection with the user[[.]] and calling the user back at the at least one initiating a second connection using the phone number.

18. (Currently amended) The system of claim 15, wherein the confirmation of the website claim ~~also requires the entrance of a personal identification number~~ is performed based on entry of a personal identification number (PIN) at the system website.

19. (Currently amended) The method of claim 18, wherein the ~~personal identification number PIN~~ is provided during the first connection upon calling into the phone call receiving device.

20. (Currently amended) A method ~~for~~ of claiming a user-specific website-associated ~~to one or more phone numbers~~, comprising the steps of:

~~performing~~ receiving a ~~website~~ request for ~~the~~ a user-specific website via telephonic communications over a first connection by calling into at a phone call receiving device ~~by a user, whereupon the at least one~~ the request including a phone number associated with the user-specific website; of said one or more phone numbers associated with said user-specific website is obtained and

determining, verified by a phone number detection device, a source phone number of the telephonic communications;

establishing initiating a website claim to the user-specific website ~~[[if]]~~ when the phone number ~~detected~~ determined by the phone number detection device matches the ~~at least one~~ phone number of ~~said one or more phone numbers~~ associated with the user-specific website; and establishing the website claim in response to confirmation of the request at completing the website claim by accessing a system website and accepting the user-specific website.

21. (Original) The method of claim 20, wherein the website claim is valid for a pre-defined length of time.

22. (Currently amended) The method of claim 20, ~~wherein further comprising verifying the at least one phone number may also be verified by asking a user for the at least one phone number; disconnecting the first connection[[.]] and calling the user back at the at least one~~ initiating a second connection using the phone number.

23. (Currently amended) The method of claim 20, wherein the confirmation ~~of the website claim also requires the entrance of a personal identification number is performed based on entry of a personal identification number (PIN)~~ at the system website.

24. (Currently amended) The method of claim 23, wherein the ~~personal identification~~

number PIN is provided during the first connection upon calling into the phone call receiving device.

25. (Currently amended) A computing system ~~for configured to~~ claim[[ing]] a user-specific website ~~where a website request is made for the user specific website~~, the computing system configured to comprising:

a phone calling device; and

receive a request for a user-specific website, the request including a phone number associated with the user-specific website;

a phone call data receiving device coupled to said phone calling device and to the [[a]] system website coupled to the Internet;

wherein:

the website request is performed at a system website by a user, establishing a website claim to one of a plurality of user-specific websites, each of said user-specific websites associated with at least one unique phone number; and

the website request causes verifying that a source phone number for a telephone connection matches the phone number associated with the user-specific website and providing a personal identification number (PIN) via the telephone connection to be sent to the phone call data receiving device through said at least one unique phone number associated with the claimed user-specific website; and

using the PIN to confirm the website request .

26. (Currently amended) The system of claim 25, wherein the website ~~claim request~~ is ~~completed~~ confirmed by accessing ~~the~~ a system website and entering the personal identification number.

27. (Currently amended) The system of claim 25, wherein the request is received via a phone call data receiving device ~~is a call paging device~~.

28. (Currently amended) The system of claim 25, wherein the verifying is performed by a phone number detection device ~~phone call data receiving device is a facsimile device.~~

29. (Currently amended) A method ~~[[for]]~~ of claiming a user-specific website, the method ~~comprising the steps of:~~

~~performing receiving~~ a website request ~~at~~ via a system website ~~by a user~~ to establish a website claim to one of a plurality of user-specific websites, each of said user-specific websites associated with at least one unique phone number; ~~and~~

in response to said receiving, sending a personal identification number (PIN) ~~to~~ via a phone connection established through a phone call data receiving device ~~using said at least one unique phone number associated with the claimed user-specific website in response to the website request upon verifying that the phone connection is established with the at least one unique phone number; and~~

confirming the website claim when the PIN is received via the system website.

30. (Currently amended) The method of claim 29, wherein the phone connection is established by call the at least one unique phone number ~~further comprising:~~

~~completing the website claim by accessing the system website and entering the personal identification number.~~

31. (Currently amended) The ~~system method~~ of claim 29, wherein the phone call data receiving device is a call paging device.

32. (Currently amended) The ~~system method~~ of claim 29, wherein the phone call data receiving device is a facsimile device.
